PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications for GCC and UK clients. Hands-on experience with React, Node.js, Next.js, GraphQL, and AWS, working on customer-facing platforms, role-based access systems, and cloud-native architectures. Known for delivering business-impacting features such as promo engines, automation workflows, and secure authentication. Comfortable working in Agile teams, conducting client demos, and mentoring junior developers.

EDUCATION

MES College of Engineering, Kuttipuram, India

2017 – 2021

Bachelor of Technology in Computer Science

EXPERIENCE

Full Stack Developer | Envigo Technologies

AUG 2022 – DEC 2025

Kochi, Kerala

- Designed and developed end-to-end web applications using React, Node.js, and PostgreSQL for international clients.
- Built secure backend APIs and role-based access control to support admin, staff, and customer workflows.
- Worked closely with product managers and designers to turn business requirements into scalable technical solutions.
- Identified performance bottlenecks and implemented optimizations to improve system reliability and speed.
- Studied business functions, and evaluated requirements to establish operational objectives.
- Mentored junior developers, conducted code reviews, and supported best practices across the team.
- Led live product demos with clients and incorporated feedback into production releases.

PROJECTS

Chicking (GCC based)

React.js, Node.js, Next.js, JavaScript, GraphQL, AWS, PostgreSQL, Firebase

DEC 2024 – DEC 2025

- Developed a customer management platform for a GCC-based restaurant chain to track user profiles and purchase history, enabling targeted promotions and improved repeat purchases.
- Integrated a **dynamic promo code engine** with real-time validation, delivering personalized discounts based on user history and location, increased engagement by 30%.
- Integrated secure **online payment gateways and SMS notification services** to support seamless ordering, transaction updates, and customer communication.
- Designed configurable country-level settings, enabling quick onboarding of new regions with localized pricing, promotions, and communication rules.
- Implemented secure, **role-based authentication** to manage access levels for admins, staff, and customers, improving system security and administrative control.

WSAC- We Swap Any Car (UK based)

React.js, Node.js, JavaScript, Python GraphQL, AWS, MongoDB, Firebase

SEP 2023 – DEC 2024

- Developed a **reusable image validation system** using AWS to automatically detect and censor non-compliant images based on content, format, and resolution.
- **Automated rate change management** workflows, reducing manual effort by 40% and boosting operational efficiency by 25%.
- Integrated key AWS services (Lambda, Redshift, RDS, S3, etc.) to build scalable, secure, and reliable cloud infrastructure.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL , C

Web Stack: HTML/CSS, React.js, Next.js, Node.js, Express, GraphQL

Libraries: Tailwind CSS, Bootstrap, Jest.js

Databases: MongoDB, PostgreSQL, Firebase, MySQL

Cloud Services: AWS (Lambda, S3, EC2, API Gateway)

Dev Tools: Docker, Bitbucket, GitHub, CI/CD.

Tools & Methodologies: JIRA, Agile, REST API, Microservices Architecture, Sprint Planning.

LANGUAGE

- English: Read, Write, Speak
- Malayalam: Read, Write, Speak
- Hindi: Read, WriteS, Speak
